

Triple K

To triple production of a single operator!

TRIPLE K

3 heads innovative single disc machine

Watch the VIDEO

New Klindex® Triple K: tripled productivity.

The 3-head single brush - Triple K - is a single-phase machine with variable speed. Thanks the extreme manoeuvrability, it is also a suitable solution to be used by an inexperienced operator, whose productivity is tripled thanks to 3 oscillating heads.

An ideal solution for polishing large surfaces, the New Triple K performs diamond grinding and polishing with polish. By mounting adjustable wheels that rest on the ground, crystallisation is performed effortlessly and moving the machine from one room to another is simple as it folds and goes through the normal doors in houses and offices.
